EXPERIENCE

ML Intern

Jan 2025 – Mar 2025

EduNet Foundation-AICTE

Remote internship

- Engaged with a cross-functional team of 5 to design and develop a Disease Outbreak Prediction Model, aimed at early detection and public health support.
- Leveraged ensemble learning techniques, including Bagging, to enhance the model's predictive performance, achieving 96% accuracy and identifying the top three sources of prediction errors.

PROJECTS

Recomendation engine using CLIP | *Python, Streamlit, NLP, Pandas* | [github Link](#)

Jul 2026

- Built an AI Product Intelligence System (*live demo*) using OpenAI's CLIP model and FAISS vector search to power natural-language reverse image search across a 44,424-item fashion catalog, with custom re-ranking logic to boost relevance by color, category, and usage.
- Designed an unsupervised deduplication pipeline using DBSCAN clustering on CLIP embeddings (cosine similarity) to identify near-duplicate listings, reducing a 44,424-product catalog to 39,107 unique items removing 5,317 duplicates (12%) automatically.

Industrial anomaly detection | *Python, Open CV, YOLO26, Arduino*

Mar 2026 – Apr 2026

- Designed an AI-powered industrial safety monitoring system for automated PPE compliance detection and analog gauge inspection using computer vision.
- Trained YOLOv26-based object detection models on custom industrial datasets comprising 6 PPE categories and 2 gauge-reading classes.
- Obtained 98% precision for gauge detection and 84% overall precision for PPE detection, enabling reliable anomaly detection and safety compliance assessment.

Email Agent | *Python, Gemini, Streamlit* | [github Link](#)

Feb 2026 – Mar 2026

- Developed an AI-powered email assistant for inbox categorization, task extraction, and automated response generation using prompt-driven workflows (*live demo*).
- Built a full-stack application with FastAPI and Streamlit, enabling conversational interaction with email data.
- Designed configurable prompt pipelines for email classification, information extraction, and context-aware draft generation.
- Implemented email summarization and action-item detection to improve productivity and automate inbox management.

EDUCATION

VIT Bhopal University

Bhopal, MP

Bachelor of Technology in Computer Science

8.49 CGPA (May 2026)

Amresh Sharma Public School

Bhilai, CG

Higher Secondary (CBSE Board)

(May 2022)

Gurukul Public School

Kawardha, CG

Higher Secondary (CBSE Board)

(May 2020)

CERTIFICATION

Data Science with Python | Finlatics

Jan 2025

ACHIEVEMENTS

Head of Department | VITAKSH-Satellite chapter

Aug 2024-Dec 2025

Managed On Board Computer for Balloon Satellite

OTHER

Technical Skills: Python (Pandas, OpenCV, Streamlit), SQL, Arduino, Power BI
